### HOW TO MEASURE:

**1. CHEST:** To determine your chest size, stand up straight with your arms by your sides. Wrap a tape measure under your armpits, around the largest part of your chest. The tape measure should wrap across your shoulder blades, and be comfortably snug against you. Chest measurements are shown in inches.

**2. WAIST:** To determine your waist size, find the top of your hip bone and the bottom of your ribs. Place the tape measure midway between these points and wrap it around your waist. Waist measurements are shown in inches.

**3. HIP:** To determine your hip size, measure the fullest part of your body, at the top of your leg, about 7 inches below your waist. Hip measurements are shown in inches.
